Overview

Undoubtedly Forex market can give returns which no market can give. If you are trading currencies you feel the heat, yeah it's not easy! It's always one is winner and another is looser, you fall on looser side because you don't expertise on it. You know so many thing but things don't turn the way you thought. So, here we bring a professional course which is designed as per your need. Fill the hole in your trading style!

Why do we trade Forex?

Wollahh! I wanna trade because everyone else is trading!

We trade Forex because, it is something we can understand and we can expertise. You can trade in your busy schedule because it a 24 hour market. You can make it your profession. However, We tell you here - it needs your attention and dedication with proper discipline. *There is no easy way to easy money!*

Who can learn?

Anyone, course is designed for students and professional traders who take Forex trading seriously.

Training Method

- In 5 training sessions for 7 hours each. We go with training concepts in initial training hours in live market. Then take 2-3 live example and analyze them in another session.
- In practice sessions we see how you have taken the trade, we analyze and improve your trading style and see, you don't make mistakes.
- Maximum 5 students are in a Batch so that instructor can see each, what they learning.
- Students are provided Computer in classroom program or you can bring your own laptop or tab. We provide equip you with software's and data.

Detailed Course Curriculum

DAY 1

- **Forex Basics**
Learn why we should trade forex! How it all started, understand global forex market, history and current scenario! Who all are market participants, how they impact the market! Few powerful information which you must know before you trade.
- **Forex Terminologies**
Understand all the terms used in FX market like spot, lot, pip, quote, rollover, carry trade, position sizing and more. Understand the trading mechanism, type of trade you can do and market structure.
- **Understanding Currency Pairs**
Every trade takes place in currency pairs. You must have strong understanding of major, minor and exotic pairs. Which are safe heaven and which are more risky?
- **Creating Trading Plan**
Here, we'll learn to assess ourselves. Our riskless capital, position size, time we have, our own behavior. Create a plan for tomorrow's trading. Learn about the mistakes we do when creating a plan.
- **Trading style**
We'll go through various trading styles used by pro-traders like scalping, swing trading, positional trading and more. You'll understand which trading style suits you and your need. Not just adopting a style but flows of it. How can we improve it even more!

DAY 2

- **Live in action**
It's time that we execute our trade. Hey, hold on! Before that we need to prepare what we gonna do today. Executing our trading plan!
- **Orders and Stops**
We'll go through various order types, use them in our trade! Which is used when and why! Types of stop losses! Which one to use when and why!
- **Do some Live trade**
We see if you can trade at this level, effective trading! Are you following your own plan! Trade and analysis of what you've traded.
- **Time Zones**
You'll secure a strong knowledge of various time zones and highly active currency pairs. Know which one is good to trade in which time zone.

- **Risk Management**

It's a very strategic part, a highly required skill before you jump to trade! There are various ways you manage your risk like position sizing, low leverage, diversification and derivatives. You'll understand the most effective strategies and when you can use which one!

DAY 3

- **Live Trade with Instructor**

Another session on live trading and analysis! Are you able to implement all those you learnt before in combined way. Check on your risk management and trading plan both.

- **Trading on News : Global Economics**

Learn to trade on News. Get to the data source, analysis, interpret and trade on the data. Normally, people analyze data accurately but fail to trade effectively. So, Learn to trade data.

- **Data mining and analysis**

Understand where to get stats, how do we crunch valuable information to make money. Learn trading on correlations like dollar, gold, crude, weather, equity and commodities. Understand dollar index and its past data to learn how you can use it in your trading plan.

- **Trade Management**

Once you have learnt to enter the trade it's time to manage the trade, where to take the profits, shall we scale In or Out. Trade management helps you in taking maximum profits possible, learn the techniques to reduce your losses and stretch the trade at max.

Day 4

- **Live trade with instructor**

Another session on live trading and analysis! Are you able to implement all those you learnt before in combined way. Check on your analytical skills trade on News yourself along with us.

- **Technical Analysis Tools**

So, here we start technical analysis, start with basics using live example and trades. Carefully, observe and learn to overcome minor mistakes you do while trading. Use these indicators in an efficient way in various time frames.

- **Time Frame Analysis**

Learn to trade in various timeframes; you can utilize your expertise to exploit price movements in very smart way. This can give you more confidence in trading.

DAY 5

- **Live Trading and Analysis**
Trade with instructor in the live market, implement all that you learnt in previous day.
- **Technical Analysis Continues..**
We refine you more on technical skills.
- **Scalping Techniques**
People who are normally impatient, choose scalping trading techniques. There are people who do only scalping in Forex to exploit every minor move in currency price.
- **Swing Trading System**
Those with little heavy pocket go for positional trades but those who don't have millions makes better profit with swing trading. We equip you with skill sets to be a good swing trader. We see how you can do swing trading using your technical skills and refine it to the professional level.
- **Trading on Momentums**
Many traders trade with the trend and try to take advantage of momentum moves after a breakout. You'll learn to trade on momentum and learn to avoid common mistakes.
- **Emotions and Money management**
Most of the trades are influenced by your emotions. Human need, want, greed, fear and many more emotion are cause for our losses. Master your emotions, learn to identify your emotional state, enhance your skills to control your emotions and use them in effective trading.

DAY 6 to 9

Finally, after completing the program you have to stand on your own. You can't walk forever holding our hand. Trade for yourself everyday and we'll be there to guide you, improve you, correct you and that's how you master the FOREX.

Day 10

Final Exam and You make world a richer place
